

Sachin Tyagi

Senior Backend Engineer — PHP | Python | AI-Assisted Development

Noida, Uttar Pradesh, India | +91 8826483709 | 101sachin.tyagi@gmail.com

PROFESSIONAL SUMMARY

Senior PHP Lead Developer with 12+ years of experience architecting and delivering backend systems, REST APIs, and full-stack web platforms using PHP, Laravel, and CodeIgniter. Proven track record leading mobile API architecture and implementation for multiple published apps, and driving front-end and back-end delivery for high-traffic news and e-commerce platforms. Currently expanding into Python, Linux systems administration, and cloud/container deployment (AWS, Docker) to round out full-lifecycle backend ownership, alongside hands-on exploration of AI-assisted development workflows using Claude, ChatGPT, and the Model Context Protocol (MCP).

CORE SKILLS

Leadership & Architecture: REST API Architecture & Design, Mobile Backend Architecture, Technical Ownership, Code Review, Cross-functional Delivery

AI Tooling & Developer Workflows: Building with Claude and ChatGPT for AI-assisted development; working with the Model Context Protocol (MCP) for tool/agent integrations

Practices & Tools: Agile workflows, Git version control, code review, API documentation standards

Backend Languages & Frameworks: PHP, Laravel, CodeIgniter, Slim, Python, Node.js

Frontend: React, JavaScript, jQuery, HTML5, CSS3, Bootstrap

Databases & Servers: MySQL, MySQLi, PDO, SQL Server, MongoDB, Apache

Infrastructure & Deployment: Linux System Administration, AWS (EC2, S3), Docker & containerized deployments, Nginx, Application Deployment & CI basics

CMS & E-commerce: WordPress, Magento

WORK EXPERIENCE

Team Lead / Full Stack Developer — Arresto Solutions Pvt Ltd, Noida *Jun 2023 – Present*

- Designed and implemented the complete mobile API architecture for Karam Industries' Arresto Asset Integrity platform (Laravel, CodeIgniter, REST API/Slim).
- Led PHP/Laravel backend architecture and REST API design for mobile applications published on the Google Play Store, including Karam DMCC and KStrong Asia.
- Owned API architecture decisions end-to-end, from schema design through implementation, for client-facing production apps.

Sr. Software Developer — azusol.com *Aug 2018 – Jun 2023*

- Led PHP/Laravel backend architecture and REST API design for mobile applications published on the Google Play Store, including Arresto Connect, Ecab, and RunPro.
- Owned API architecture decisions end-to-end, from schema design through implementation, for client-facing production apps.

Sr. Software Engineer — Dainikbhaskar.com (DB Corp Limited) *Nov 2016 – Aug 2018*

- Worked across frontend and backend on Bhaskar Group's high-traffic news properties (Dainikbhaskar.com, Divyabhaskar.com, Divyamarthi.com, Moneybhaskar.com, Dbvideos.in).
- Led the revamp of legacy site modules using modern tooling — service worker integration, Angular modules, and React modules — to modernize the platform.

Software Engineer — Flash On Mind *Mar 2011 – Jul 2016*

- Delivered PHP/CodeIgniter-based REST API backends for mobile apps, including CHILL and Karam Industries, owning mobile API architecture and implementation.

- Built and maintained a portfolio of WordPress, Laravel, and CodeIgniter web platforms across e-commerce and corporate clients.

Software Engineer — Myzeal IT Software Solution

Aug 2010 – Mar 2011

- Contributed to early-stage web development projects, building foundational PHP and front-end skills.

Industrial Training: NECHCL System Technologies Limited

KEY PROJECTS

REST API Architecture — Mobile Applications

Designed and implemented REST API backends for published mobile apps across two roles: Arresto Connect, Ecah, and RunPro (at azusol.com), and Karam DMCC and KStrong Asia (at Arresto Solutions) — all live on Google Play Store.

Bhaskar Group News Platforms (Web/WAP)

Dainikbhaskar.com, Divyabhaskar.com, Divyamarthi.com, Moneybhaskar.com, Dbvideos.in — full-stack development and platform modernization for high-traffic media properties.

Mobile App Backends — CHILL & Karam Industries

Architected and implemented REST API backends (CodeIgniter + Slim Framework) with full ownership of mobile API design decisions.

E-commerce & Corporate Websites

Delivered end-to-end websites including JaldiAD (e-commerce), Pearl Academy, Enablers Investment, Tracinventory, FashionFad, Karam, Globalmanetwork, and Toyplus — spanning WordPress, Laravel, and WooCommerce implementations.

EDUCATION

MCA — Graphic Era Institute of Technology (Uttaranchal Technical University), 2009

B.Sc. (Physics, Chemistry, Mathematics) — Gurukul Kangri University, Haridwar, 2003

XII & X — UP Board, 2000 / 1998
